Russian will pay.. i want to listen. This game is my flesh and blood. I love this game. To death. This and Hotline Miami 2 are my favourite games of all time and the soundtracks are like crack to me. 11V10 would go on a revenge-fueled acid trip again. It\u2019s really good game, short and fun ... nothing more to say. The game itself is fantastic. Story is cryptic and surreal, but really engaging. It's addictive hell and handles smoothly. My only complaint is it does crash rather frequently on Windows. Surprisingly very stable on my Ubuntu machine.. "This does put a smile on my face.". 80s murder simulator.

. Amazing Brutal Action Game set in the '80s

10V10 Great GAME!

Time to bust out my shoot move. Came for the soundtrack and art, stayed for the gameplay.. Hotline Miami is one of the best 2D run around and kill everyone type of games there is.

The music itself is not only very deep in detail and sound quality but somewhat hypnotizing. I would compare the music in Hotline Miami to Payday 2's music. For some reason it blends very well with gameplay and for me the music in both games actually helps me concentrate.

For the music alone this game is already a 5/10 but with the gameplay, graphics story and everything combined to make the amazing game it is I cant even put this game on a scale without it receiving a perfect rating.

10/10 for everything about Hotline Miami. Hotline Miami is  
It simply is itself, I can barely compare it to any other game I've played  
At the beginning I snobbed it because I felt it was just some nonsense violent game, and I was KINDA right.  
But more in the way that nonsense means hard to understand  
Hotline Miami's plot is as thick and abstract/metaphorical as it can get, and You will play 70% of the game thinking "well I'm not getting what's this all about but hell I like it a lot.  
If the story is really good the fighting system is also really fun to play and to master, mixing together in an extremely worth gaming experience  
You have no excuses it's on sale almost always and it requires about 7 hours to finish, just get it. Best game ever made, the atmosphere is fantastic.  
This game is perfect.  
Just buy it.... This is my first play of a game from Dennaton Games, it's simple but it's a lot of fun. It's combat is very basic but effective. It's a pixel art style game but this does not subtract from the game infact it works really well, it's short however it's one of the better stories I've played recently, surprisingly. It's soundtrack though... It's just incredible. I'd definitely pick this up if you're looking for a game that's straight to the point and fun. It's relatively short though, fair warning!. Takes a TON of skill and is not easy in the slightest... perhaps it is average to do the minimum but to get the highest scores one must put in effort.. Wait you don't already own this? ..... I'm disappointed.
