
Every Child is Special Every child deserves to be respected, valued, and well-educated. That's why education is our priority in the United States. There are many people who believe that every child is "special" simply because they are born, even though there are countless children who struggle learning crucial skills for future success. With that being said, there are billions of dollars spent on teaching methods that fail one in five students. There's no doubt that this system doesn't work! It only makes the problem worse by perpetuating inequalities. It's time to take control. It's time to work towards... equality in education. Let's get started! ["...EQUALITY IN EDUCATION.]"
